Purpose: The purpose of this lecture is to enter and execute a simple Java Program using the IDE NetBeans.

Overview: We are going to start NetBeans and locate your projects on your flash drive in a folder labeled L003 that is in folder Lectures.

Steps:
1. Insert your USB Flash Drive in the USB receptacle on your computer.
2. Click the Start Button on your computer and select All Programs in the left column.

Figure 1. Start Button | All Programs
3. Click NetBeans.
4. Click NetBeans IDE.
5. Alternatively, double-click the NetBeans IDE icon on the desktop (if it exists).
