

Project: p06

Assignment: (Phone key pad) The international standard letter/number mapping found on the telephone is show below:

Write a program that prompts the user to enter a lowercase or uppercase letter and displays its corresponding number. For a nonletter input, display invalid input.

```
run:
Enter letter: A
The corresponding number is 2
BUILD SUCCESSFUL (total time: 5 seconds)
```

```
run:
Enter letter: a
The corresponding number is 2
BUILD SUCCESSFUL (total time: 5 seconds)
```

```
run:
Enter letter: +
+ is an invalid input
BUILD SUCCESSFUL (total time: 5 seconds)
```

Program Files: Project 6 consists of file **p06.zip**. File **p06.zip** is the folder containing Java project p06 created by Apache NetBeans. Attach file **p06.zip** to a note addressed to me, trturner@uco.edu, having the subject line crn-lastname-firstname-p06. For example, if you are Alan Turing and you are enrolled in CRN 25440, then the subject is **25440-Turing-Alan-p06**.
