Project:	**p03**
Assignment:	Implement the desk calculator described in chapter 6 of The C++ Programming Language by Bjarne Stroustrup. Make modifications to the implementation such that program **p03** does not use namespaces or the standard template library including the string and map classes.

Program Files:	Project **3** consists of file **p03.C**
Command Line:	Program **p03** accepts a single command line argument as shown below.
	$ **p03** "rate=1.934;150/rate;19.75/rate;217/rate"
Output format:	Input and corresponding output is shown in Figure 1.

```
$ p03 "rate=1.934;150/rate;19.75/rate;217/rate"
1.934
77.5595
10.2120
112.2027
$
```
